

LR LocaRise

GLOBAL SOLUTIONS

Beyond language.
Beyond boundaries.

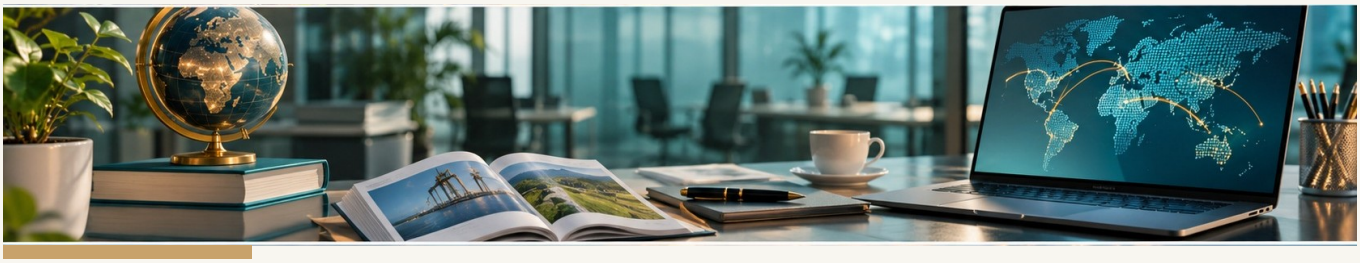

Enterprise language services · AI language intelligence · Sustainability & energy · Corporate strategy · Government & tender support

AZERBAIJAN • CANADA • INTERNATIONAL MARKETS

WHO WE ARE

One connected enterprise

An international service network built around professional language capability, domain expertise, and evidence-based advisory.

LocaRise began operations in Azerbaijan in 2016 and expanded through **LocaRise Inc.**, an Ontario corporation established in 2024. The shared brand brings together language services, specialist communication and technology-supported project delivery.

TWO LEGAL ENTITIES. ONE SHARED BRAND.

LocaRise LLC • Azerbaijan: translation, localization, interpreting, multilingual project delivery and enterprise language solutions.

LocaRise Inc. • Canada: corporate language services, international client relationships, technology-supported solutions and the LocaRise Global specialist brand.

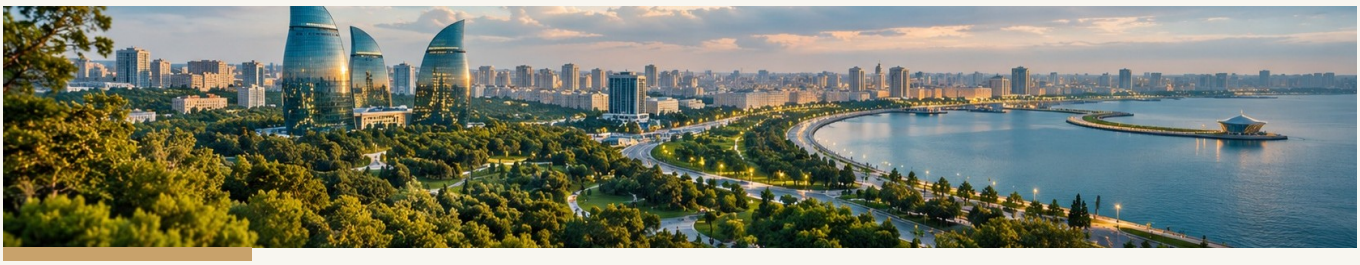

LOCARISE GLOBAL

Specialist advisory and innovation brand of LocaRise Inc., focused on sustainability, energy transition, climate resilience, business intelligence and AI-enabled communication. LocaRise Global operates through the Canadian corporate platform, with international project delivery aligned to client needs.

PRESENCE & ACCOUNTABILITY

Canada. Azerbaijan. Global.

Clear contracting identities and local relationships enable coordinated work across international markets.

FUTURE MARKET DEVELOPMENT

LocaRise is developing future market relationships in the United Kingdom and Denmark, with service delivery coordinated through its established operations.

SECTOR EXPERIENCE

Where precision matters

LocaRise aligns language expertise, content workflows and advisory support with sector-specific risks and buying processes.

ENERGY & INDUSTRY

Energy, oil and gas, power, renewables, engineering and industrial operations.

AUTOMOTIVE & LOGISTICS

Vehicle documentation, logistics, international trade and transport systems.

TECHNOLOGY & TELECOMS

Software, digital products, network services, AI data and localization.

CORPORATE & FINANCE

Contracts, commercial documentation, governance, finance and procurement.

PUBLIC & INTERNATIONAL

Public communication, research, education, development and NGO programmes.

SUSTAINABILITY & CLIMATE

ESG, carbon data, climate policy, risk communication and technical research.

ENTERPRISE LANGUAGE SERVICES

Specialized translation

Precise language for corporate, technical and regulated environments, with subject-sensitive handling from briefing to delivery.

1 Legal & contractual

Agreements, corporate governance documents, supplier terms, litigation-related materials and policies, translated to the intended jurisdiction and audience.

2 Financial & commercial

Annual reports, audit correspondence, procurement records, investor materials and financial presentations, with controlled terminology and formatting.

3 Technical & engineering

Specifications, operating manuals, equipment documents, safety materials and drawings, supported by subject-matter terminology review.

4 Scientific & academic

Research papers, scientific reports, abstracts, grant and conference materials, editing and multilingual knowledge dissemination.

5 Healthcare & life sciences

Patient-facing information, non-clinical reports, research documentation and medical-device content according to the project-specific risk and reviewer requirements.

6 Energy & environment

Climate-policy briefs, emissions documentation, energy-transition publications and environmental technical reports for specialist audiences.

TYPICAL DELIVERABLES

- Translated editable document
- Bilingual terminology sheet
- Tracked queries and review log
- Final QA and formatted delivery

FOR Energy, infrastructure and industry • Professional services and corporate law • Research institutions and public bodies

INDUSTRIAL SPECIALIZATION

Energy and engineering language

Technical language must preserve processes, specifications, risk statements and units. LocaRise coordinates sector-specific document workflows.

1 Energy projects

Upstream and downstream materials, power generation, renewable energy development, feasibility content and stakeholder communications.

2 Industrial operations

Maintenance plans, technical procedures, inspection notes, equipment inventories, training manuals and operating instructions.

3 Engineering & construction

Design briefs, tender specifications, method statements, supplier deliverables and progress reports with consistent vocabulary.

4 Transport & logistics

Shipment documents, customs-related correspondence, manuals, fleet records and operational procedures.

5 HSE & environmental

Health, safety, environmental and compliance communication, handled with review appropriate to high-consequence content.

6 Project documentation

Shared glossaries, revision control, document packages and coordinated multi-language releases for project teams.

TYPICAL DELIVERABLES

- Terminology and acronym register
- Translated technical package
- Document-control matrix
- Bilingual reviewer resolution log

FOR Engineering project teams • Industrial procurement and HSE • Energy and infrastructure suppliers

FORMAL DOCUMENTS

Certified and official translations

Document services built around the acceptance requirements of the receiving institution, not one-size-fits-all assumptions.

1 Immigration records

Birth and marriage certificates, employment letters, police records, affidavits and identity documents where accepted.

2 Academic credentials

Diplomas, transcripts, statements, recommendation-related materials and degree records in designated target formats.

3 Corporate files

Certificates of incorporation, resolutions, shareholder documents, authorizations and official correspondence.

4 Contracts & legal

Commercial agreements, evidence bundles, declarations and legal forms, with special review where appropriate.

5 Authentication coordination

Notarization, legalization and apostille-related support as permitted by the relevant jurisdiction and receiving authority.

6 Submission readiness

Document naming, formatting, seals and supporting components coordinated to the receiving organization-specific instructions.

TYPICAL DELIVERABLES

- Document acceptance checklist
- Certified translation where applicable
- Reproduction of seals and stamps
- Secure delivery package

FOR Individuals and families • Law firms and business immigration • Universities and corporate secretariats

INTERPRETING & EVENTS

Live multilingual communication

Professional interpreting for negotiations, conferences, operational visits and international collaboration.

1 Simultaneous interpreting

Conference and high-density meeting formats where communication must continue while speakers present.

2 Consecutive interpreting

Delegations, official meetings, technical discussions, business negotiations and small-group events.

3 Remote interpreting

Video conferences, virtual workshops and distributed teams, subject to platform and audio requirements.

4 Site and field visits

Industrial inspections, training sessions, business visits and operations meetings with pre-briefed technical vocabulary.

5 Event coordination

Interpreter scheduling, language-channel planning, briefing packs and onsite or remote support coordination.

6 Multilingual records

Post-event summaries, transcriptions and relevant translation of meeting or presentation materials.

TYPICAL DELIVERABLES

- Event language plan
- Interpreter roster and schedule
- Interpreter briefing glossary
- Post-event material package

FOR International conferences • Corporate delegations • Technical workshops and public engagements

DIGITAL MARKETS

Website and product localization

Localization adapts language, interfaces and user journeys to customers in distinct cultural and regulatory environments.

1 Websites & landing pages

Multilingual content, navigation, conversion messages, forms and structured copy for corporate and public websites.

2 Software & SaaS

User-interface strings, release notes, onboarding, in-app help and localization testing for product teams.

3 Mobile apps

App-store descriptions, menus, permissions, mobile content and culturally appropriate microcopy.

4 E-commerce

Listings, category taxonomy, campaigns, customer support content and search-friendly local-market terminology.

5 International SEO

Keyword localization, metadata, multilingual content planning and native-language quality checks.

6 Functional QA

String truncation, placeholder mismatches, locale formats, date/currency handling and linguistic regression review.

TYPICAL DELIVERABLES

- Localization style guide
- Linguistic QA findings
- String and resource-file updates
- Multilingual SEO glossary

FOR Technology and product teams • E-commerce operators • International marketing teams

Media, publishing & inclusive content

A reliable multilingual publication must preserve meaning, audience accessibility and professional presentation.

1 Subtitling & captioning

Timecoded subtitles, captions and transcript preparation for events, education, marketing and internal communication.

2 Voice & dubbing

Script adaptation, voice-over or dubbing coordination, pronunciation guides and language verification.

3 Transcreation

Campaign copy, slogans, advertising concepts and public messaging adapted for different cultures and commercial goals.

4 Desktop publishing

Multilingual brochures, reports, presentations, diagrams and formatted regulatory or technical documents.

5 Plain-language adaptation

Rewrite complex source information for accessibility, comprehension and audience suitability.

6 Under-resourced languages

Community-facing communication and cultural adaptation projects scoped around available linguistic expertise.

TYPICAL DELIVERABLES

- Subtitle and transcript packages
- Approved campaign variants
- Multilingual designed document
- Accessibility review checklist

FOR Marketing and communications • Training and public information • Events, NGOs and education

ENTERPRISE TRANSLATION OPERATIONS

Terminology, memory & program management

Consistent language requires repeatable systems: terminology, translation memory, approval rules, access control and project reporting.

1 Terminology governance

Client-approved glossaries, forbidden terms, acronyms and multilingual terminology ownership.

2 Translation memories

Re-use of verified segments for speed and consistency, with revision and context controls.

3 Linguistic style guides

Tone, voice, capitalization, branded terms, units and locale conventions across business units.

4 CAT production

Computer-assisted translation workflows with quality gates, bilingual file validation and project archives.

5 Review management

Named reviewers, query logs, version comparisons, change requests and signed completion records.

6 Managed service models

Ongoing program coordination, service levels, monthly reporting and defined escalation pathways.

TYPICAL DELIVERABLES

- Language program playbook
- Update and review reports
- Approved termbase
- Regular SLA and quality dashboard

FOR Corporate procurement teams • High-volume documentation • Multi-market software businesses

AI-INTEGRATED TRANSLATION

Human-led AI translation workflow

Use AI and machine translation selectively, under controlled terminology, security requirements and human review.

1 Content risk screening

Classify information by sensitivity, intended use, domain complexity and consequences of error before selecting tools.

2 Machine translation post-editing

Full human post-editing for suitable content, with defined error categories, reviewer expertise and acceptance rules.

3 Specialist human review

Legal, energy, scientific, corporate and other high-stakes material routed to qualified domain reviewers.

4 Prompt and terminology controls

Approved instructions, termbases, locked names, glossary testing and client-specific formatting rules.

5 Quality comparison

Compare human and machine outputs for accuracy, omissions, false statements, units, register and cultural fitness.

6 Secure processing

Use only tools and data paths authorized under the client-specific confidentiality, retention and privacy terms.

TYPICAL DELIVERABLES

- Risk-tier recommendation
- AI performance scorecard
- Human-reviewed translated file
- Review trace and corrections

FOR Enterprise knowledge teams • Technical documentation owners • Product localization teams

AI LANGUAGE INTELLIGENCE

Multilingual model evaluation

AI language quality is a measurable operational discipline, not a promise that fluent machine text is accurate.

1 LLM response evaluation

Evaluate multilingual outputs against truthfulness, instruction adherence, completeness and audience suitability.

2 Translation-model benchmarking

Compare candidate engines using a defined task dataset and structured evaluation rubric.

3 Error taxonomy design

Define omissions, added content, terminology failures, register, safety and critical-severity errors.

4 Human-in-the-loop annotation

Reviewer guidelines, double review, dispute resolution, adjudication and sample calibration.

5 Multilingual data review

Datasets, prompts, labels and responses reviewed for linguistic coverage, inconsistencies and bias risks.

6 Executive reporting

Prioritized errors, performance distributions, qualitative examples and recommended workflow changes.

TYPICAL DELIVERABLES

- Evaluation protocol
- Scored multilingual sample
- Reviewer calibration pack
- Remediation and governance report

FOR AI product teams • Public-facing virtual assistants • Enterprises using multilingual AI

CLIENT RELATIONSHIP SYSTEMS

CRM, customer success & service operations

An enterprise client relationship should be traceable from first inquiry through renewal, with consistent ownership and communication.

1 Opportunity intake

Lead source, sector, service fit, language pairs, project scope, confidentiality requirements and procurement route.

2 Account mapping

Contacts, decision-makers, site locations, recurring needs, contract terms and authorized communication channels.

3 Pipeline & proposal tracking

Qualification, follow-up dates, RFP milestones, estimated value, approval status and next action.

4 Project handoff

Formal transfer from sales to delivery with scope, glossary, deadlines, pricing and data-handling instructions.

5 Service quality reviews

Customer feedback, issue logging, corrective action, service-level reporting and structured account reviews.

6 Retention & growth

Renewal planning, repeat assignments, cross-service referrals and opt-in communication based on applicable rules.

TYPICAL DELIVERABLES

- Account and opportunity schema
- Handoff checklist
- Pipeline stage dashboard
- Monthly account review report

FOR Enterprise buyers • Recurring B2B accounts • Government and institutional suppliers

INFORMATION PROTECTION

Confidentiality, privacy & responsible AI

High-trust work begins with data classification, restricted access and clear rules on what may be shared with third-party systems.

1 Non-disclosure frameworks

Project-specific NDAs, confidentiality obligations, client-use restrictions and subcontractor commitments.

2 Access control

Role-based access, identity checks, least-privilege access and timely removal of credentials.

3 Data lifecycle

Secure receipt, retention periods, version archives, controlled sharing and defensible deletion procedures.

4 AI authorization

Client-approved AI use cases; safeguards against entering restricted source content into unauthorized public tools.

5 Incident readiness

Escalation contacts, suspected disclosure handling, issue documentation and client notification according to contracts and law.

6 Supplier governance

Security questionnaires, approved vendor lists, confidentiality flow-down and specialist resource vetting.

TYPICAL DELIVERABLES

- Confidentiality schedule
- Security questionnaire response
- Data classification guide
- Project-specific access record

FOR Corporate legal and compliance • R&D and technical teams • Government procurement and public bodies

PUBLIC-SECTOR LANGUAGE ACCESS

Government & institutional communications

Public bodies need accessible, accurate and timely communication that serves residents, partners, suppliers and staff.

1 Bilingual and multilingual content

Official notices, service instructions, guidance documents, public programmes and outreach materials.

2 Community and stakeholder access

Multilingual consultation resources, accessible summaries, culturally responsive information and event interpreting.

3 Policy and research documents

Public consultations, surveys, white papers, research abstracts and evidence briefs prepared for diverse audiences.

4 Procurement and contract materials

Translations of bid documents, supplier terms, meeting records and implementation information.

5 Digital accessibility

Plain-language adaptation, captions, format review, web localization and user guidance.

6 Program communication

Multilingual service rollouts, announcement materials and monitoring reports with controlled versions.

TYPICAL DELIVERABLES

- Program language-access plan
- Meeting and interpretation plan
- Accessible bilingual public package
- QA and approval trace

FOR Federal, provincial and municipal bodies • International organizations • Nonprofits and education

TENDER SUPPORT

Bid intelligence & proposal coordination

Tenders create opportunities only when eligibility, scope, confidentiality and submission rules are understood in advance.

1 Market and notice monitoring

Sector-specific tender scanning, buyer lists, prequalification alerts and bid calendars.

2 Bid / no-bid assessment

Eligibility, capacity, contract risk, margins, timelines, teaming options and mandatory evidence review.

3 Compliance matrices

Translate procurement instructions into document lists, responsibility assignments, response outlines and exceptions.

4 Multilingual proposal production

Technical and corporate writing, editing, translation, document formatting and version control.

5 Partner coordination

Subcontractor capability statements, joint-service proposals, NDA and service responsibility arrangements.

6 Submission operations

Clarification registers, deadline tracking, internal approvals, submission packages and lessons learned.

TYPICAL DELIVERABLES

- Tender opportunity shortlist
- Bid eligibility matrix
- Proposal production schedule
- Submission-ready document index

FOR Government procurement teams • Industrial EPC and service suppliers • UN, development and donor-funded projects

Sustainability & corporate advisory

LocaRise Global is the specialist sustainability, business and language-intelligence brand operated through LocaRise Inc.

1 Corporate sustainability

Material topics, gap assessments, practical action plans and stakeholder communication relevant to business strategy.

2 Sustainability reporting

Evidence coordination, report structures, KPI libraries, environmental content and multilingual disclosures.

3 Supplier sustainability

Questionnaires, procurement requirements, evidence files, partner communication and supply-chain readiness.

4 Energy transition

Industrial emissions data, clean-energy opportunity scanning and decarbonization planning supported by suitable experts.

5 Climate and resilience

Geospatial screening, hazard exposure analysis, scenario-informed risk reviews and adaptation planning.

6 Commercial strategy

Market-entry research, international tenders, strategic partnerships, research briefs and corporate intelligence.

TYPICAL DELIVERABLES

- Sustainability readiness memo
- Management dashboard concept
- Strategic action roadmap
- Multilingual stakeholder package

FOR Energy and manufacturing • Suppliers to global companies • Public-interest and research organizations

Sustainability readiness & reporting

Deliver proportionate sustainability intelligence: define the reporting question, locate the evidence and communicate limits clearly.

1 ESG gap assessment

Map current policies, indicators, responsibilities, stakeholder expectations and missing evidence.

2 Material issues review

Screen climate, energy, workforce, governance and supplier topics using relevant sector context.

3 Framework mapping

Organize information against applicable voluntary or mandatory standards where relevant to client jurisdiction and business type.

4 Sustainability communications

Evidence-backed annual-report text, supplier statements, investor materials and multilingual external information.

5 KPI governance

Define indicator owners, calculation notes, data sources, evidence retention and sign-off responsibilities.

6 Improvement planning

Prioritize feasible policies, data collection, training, operational changes and future-assurance readiness.

TYPICAL DELIVERABLES

- ESG readiness scorecard
- Management action plan
- Indicator register and evidence map
- Draft reporting content

FOR Industrial SMEs and exporters • Corporate sustainability teams • Procurement and investor relations

CARBON & DECARBONIZATION

GHG data and industrial transition

Turn energy and activity data into a decision-grade emissions baseline and practical reduction priorities.

1 GHG inventory support

Scope 1 and 2 calculations and selected Scope 3 categories using defined boundaries, emission factors and source records.

2 Operational data capture

Fuel, electricity, fleet, utilities, supplier and material datasets, with units and assumptions documented.

3 Reduction opportunities

Energy efficiency, process improvements, electrification, procurement, logistics and behaviour interventions.

4 Industrial transition pathways

Scenario comparison, cost and feasibility screening, dependencies, milestones and implementation ownership.

5 Evidence for supply chains

Product- and facility-related emissions data requests, questionnaires and supporting document coordination.

6 External communication

Technical management summaries and multilingual emissions documentation without unsubstantiated climate claims.

TYPICAL DELIVERABLES

- Emissions boundary memo
- Reduction opportunity register
- Activity-data workbook
- Executive dashboard

FOR Manufacturing operations • Energy-intensive suppliers • Property, fleet and logistics managers

ENERGY STRATEGY

Energy efficiency and renewable transition

Combine technical analysis and strategic research to help organizations assess energy performance and clean-energy options.

1 Energy-use baselines

Facility consumption patterns, seasonal profiles, process demand and indicator selection.

2 Efficiency opportunities

Preliminary screening for process optimization, lighting, HVAC, maintenance and operating practices.

3 Renewable project scanning

Solar, wind, power procurement and distributed-energy considerations subject to local policy and engineering review.

4 Financial comparison

High-level cost-benefit, payback and scenario assumptions for management decision-making.

5 Implementation roadmap

Practical sequencing, technical partners, data collection needs, milestones and risk owners.

6 Performance communication

Internal dashboards, staff training content and multilingual technical summaries.

TYPICAL DELIVERABLES

- Energy baseline note
- Scenario comparison
- Opportunity shortlist
- Implementation roadmap

FOR Commercial and industrial facilities • Transport and warehousing • International energy developers

CLIMATE INTELLIGENCE

Physical climate risk & GIS

Assess how climate hazards could affect assets, operations, supply chains and communities using documented geospatial evidence.

1 Hazard screening

Flood, heat, wildfire, storm and other location-specific exposure using appropriate datasets and resolution.

2 Asset mapping

Sites, critical infrastructure, transport corridors, supplier facilities and operational dependencies.

3 Climate scenarios

Baseline and future climate conditions compared over relevant planning horizons, with uncertainty explained.

4 Risk prioritization

Exposure, vulnerability, business consequence, data quality and adaptation feasibility.

5 Adaptation measures

Options for monitoring, facility protection, business continuity and stakeholder coordination.

6 Accessible reporting

Maps, short executive briefs, multilingual risk communication and data sources suitable for review.

TYPICAL DELIVERABLES

- Geospatial exposure map
- Scenario narrative
- Risk screening matrix
- Adaptation actions

FOR Infrastructure operators • Industrial property owners • Regional and public-sector planners

SUPPLY-CHAIN SUSTAINABILITY

Supplier ESG & procurement readiness

Supplier questionnaires and sustainability evidence can become a manageable business workflow rather than a recurring scramble.

1 Questionnaire services

Collect supplier environmental, labour, governance and emissions information in consistent formats.

2 Evidence library

Policies, certificates, utility invoices, audit statements and source references organized by validity and owner.

3 Procurement readiness

Buyer-specific requirements, contractual commitments, missing-data assessments and corrective actions.

4 International trade impacts

Screen products, sectors and obligations affected by carbon-related import rules or buyer disclosure requirements.

5 Data controls

Approval trails, supplier confidentiality, evidence updates and multi-entity reporting boundaries.

6 Multilingual supplier engagement

Questionnaires, outreach, instructions and reporting in relevant languages for international suppliers.

TYPICAL DELIVERABLES

- Supplier ESG questionnaire
- Buyer-requirements matrix
- Evidence and expiration register
- Improvement roadmap

FOR Energy and industrial exporters • OEM supplier networks • International purchasing teams

INTERNATIONAL STRATEGY

Business intelligence & market development

Evidence-based market selection, partner identification and commercial proposal support tailored to sector and geography.

1 Market-entry research

Regulatory landscape scanning, customer segmentation, local competitor analysis and channel comparison.

2 Partner mapping

Distributors, procurement decision-makers, research institutions and technology partners screened against clear criteria.

3 Commercial feasibility

Demand signals, pricing context, operating assumptions, risks and strategic options.

4 International bid support

Tenders, proposals, supplier registrations, bid partner research and multilingual response coordination.

5 Cross-border communication

Localization of corporate positioning, pitch materials, technical value propositions and executive outreach.

6 Account intelligence

CRM opportunity mapping, stakeholder relationships, follow-up plans and defined commercial milestones.

TYPICAL DELIVERABLES

- Market opportunity brief
- Commercial risk matrix
- Partner longlist and shortlist
- Go-to-market action plan

FOR Canadian exporters • Caspian and European partners • Sustainability and industrial technology firms

STRATEGY & KNOWLEDGE

Research, policy & stakeholder communication

Make specialized evidence useful for managers, institutions, communities and international business audiences.

1 Policy and regulatory analysis

Desk research on energy, decarbonization, ESG, public procurement and international operating environments.

2 Scientific knowledge mobilization

Research summaries, technical reports, stakeholder briefings and visual communication.

3 Multilingual surveys

Questionnaire adaptation, culturally sensitive response options, translation review and publication support.

4 Public and private engagement

Stakeholder maps, consultation materials, event coordination and bilingual presentation packs.

5 Business reports

Feasibility note structures, decision memos, board papers, executive decks and evidence trackers.

6 Training & workshops

Professional terminology, sustainability concepts, intercultural communication and operational language training.

TYPICAL DELIVERABLES

- Research and policy brief
- Technical narrative and graphics
- Stakeholder engagement pack
- Workshop material set

FOR Research programmes • Energy and sustainability teams • Public institutions and NGOs

RESPONSIBLE INNOVATION

AI-powered sustainability intelligence

Practical tools that connect industrial data, sustainability documentation, linguistic expertise and human review.

1 Supplier document intake

Structured extraction from ESG questionnaires, policies, emissions evidence and technical files.

2 Data quality checks

Missing-value flags, units, duplicate records, source links and approval status.

3 Multilingual evidence review

Translation and consistency checks for cross-border reporting and procurement.

4 Management insights

Indicator summaries, priority risks, action owners and issue tracking rather than opaque single-number scores.

5 Human-in-the-loop oversight

Review of extraction, data interpretation, calculations and external claims before publication.

6 Prototype-to-pilot development

Project-scoped technical validation, user testing and feedback with partner organizations.

TYPICAL DELIVERABLES

- Workflow blueprint
- Pilot dashboard design
- Data schema and QA rules
- Performance evaluation report

FOR Industrial suppliers • Corporate ESG teams • Technology and data partners

Solutions by sector

Purpose-built combinations of language, technology and business services reduce the need to coordinate disconnected vendors.

1 Energy & oil and gas

Technical translation, conference support, ESG and carbon data, industrial tenders and stakeholder documents.

2 Renewables & infrastructure

Engineering documentation, environmental reporting, consultation and international proposal production.

3 Automotive & mobility

Workshop and service documentation, bilingual training, supplier communication and multilingual product content.

4 Logistics & trade

Import/export materials, operational manuals, commercial outreach and supplier sustainability questionnaires.

5 Technology & telecoms

Software localization, enterprise terminology, AI language evaluation and multilingual product documentation.

6 Research & public sector

Evidence summaries, accessible communication, interpreting, surveys and public procurement support.

TYPICAL DELIVERABLES

- Sector-specific capability statement
- Evidence and language plan
- Delivery team and scope proposal
- Managed ongoing service model

FOR Corporate procurement • Project directors • Government programme teams

SOLUTION PACKAGES

Integrated business service packages

Combine language, technology and specialist advisory into scoped outcomes that procurement teams can understand and manage.

1 Language operations desk

Dedicated coordination for recurring document translation, interpreting, localization, terminology and quality reporting.

2 AI translation assurance

Risk assessment, appropriate AI-assisted workflows, human post-editing, multilingual quality evaluation and remediation.

3 Industrial documentation

Technical translation, tenders, safety communications, bilingual procedures, engineering terminology and records.

4 Supplier ESG readiness

Buyer-questionnaire mapping, carbon evidence collection, multilingual supplier outreach and reporting data preparation.

5 Energy transition intelligence

Energy and carbon baselines, decarbonization options, geospatial exposure and executive communication.

6 International tender desk

Market scan, bid/no-bid screening, compliance matrices, partner coordination, translation and proposal production.

TYPICAL DELIVERABLES

- Service-level proposal
- Milestone-based deliverables
- Defined work package and owners
- Quality and governance summary

FOR International enterprise buyers • Government and institutional clients • Industrial and energy sector suppliers

PROJECT COMMERCIALS

Transparent project scoping & delivery

Procurement confidence depends on clear deliverables, assumptions, responsibilities, acceptance criteria and escalation paths.

1 Discovery and feasibility

Define geography, audiences, documents, confidentiality class, relevant standards, volume and expected business results.

2 Statement of work

Clarify output formats, required reviews, assumptions, client inputs, dependencies, milestones and change-control method.

3 Commercial structure

Fixed deliverable fees, unit pricing, milestone projects or managed-service retainers when appropriate to the work.

4 Risk allocation

Identify which technical, legal, assurance, engineering or regulatory tasks require approved subject professionals.

5 Quality acceptance

Agree who approves terminology, sampling plans, corrections, reporting metrics and final handover.

6 Ongoing partnership

Monthly account reviews, KPI governance, renewal planning, escalation, training and continuous improvement.

TYPICAL DELIVERABLES

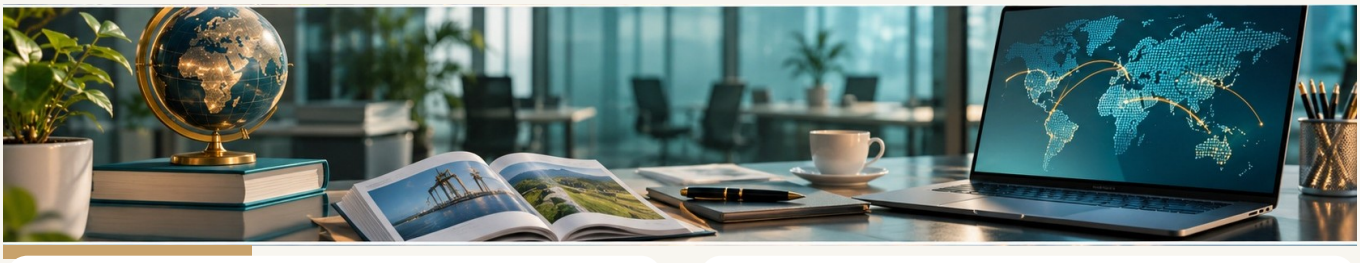

- Scope and deliverable matrix
- Milestone and payment schedule
- RACI or responsibility map
- Final acceptance checklist

FOR Corporate procurement and finance • Government tender teams • International long-term accounts

Procurement pathways

Identifying credible contracting opportunities requires official notice channels, registration readiness and disciplined bid decisions.

CANADA — **CanadaBuys — canadabuys.canada.ca**

Federal tenders: language services, public information, research and technical communication.

AZERBAIJAN — **State eTender — etender.gov.az**

Public procurement and supplier notices; local-language technical documentation.

UNITED KINGDOM — **Find a Tender — find-tender.service.gov.uk**

UK public and utilities procurements, supplier opportunities and notices.

EU / DENMARK — **TED — ted.europa.eu**

EU and EEA procurement opportunities, including Danish notices.

UNITED NATIONS — **UNGM — ungm.org**

UN system vendor registration and tender opportunities.

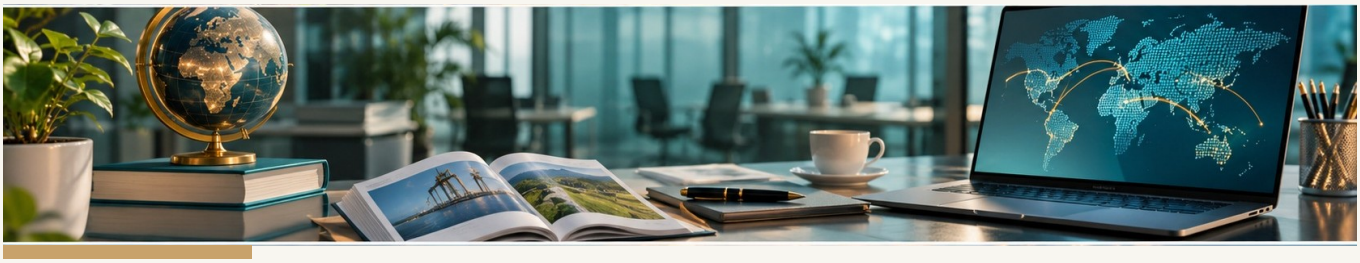

WORLD BANK — **World Bank Procurement — projects.worldbank.org**

Development project notices, consultant assignments and procurement opportunities.

SELECTED COOPERATION

Organizations we work with

A cross-industry record of cooperation and engagement across energy, technology, transport, business and international organizations.

ENERGY, INDUSTRY & INFRASTRUCTURE

Nobel Energy • SOCAR AQŞ • Masdar Azerbaijan LLC • Bahar Energy • Tekfen Baku • PD&MS Group • Magal Azerbaijan LLC • Zireh MMC • İstanbul Sanayi İnşaat

TRANSPORT, AUTOMOTIVE & LOGISTICS

Pentagon Freight Services Pcl • Toyota Bakı Mərkəzi MMC • Lexus Baku • ADY Ekspress MMC • Alliance Multimodal MMC • Azermash Group MMC • AKA Auto Group Inc.

TECHNOLOGY & TELECOMS

Azerconnect Group MMC • Figensoft Azərbaycan • Caspian Technology Group

CORPORATE, RETAIL & OTHER ORGANIZATIONS

Neqsol Holding B.V. • Retail Group Azərbaycan MMC • Grand Lens AZ • HELL Energy • North West Services LLC • FAO • Social Solutions LLC

Selected cooperation and professional relationships across industry, technology, transportation and international organizations.

LEADERSHIP

Research-informed strategy

The founder's academic and executive experience connects language, sustainability and applied business intelligence.

AYSHAN MAMMADZADA, MSC, PMP

Founder & Managing Director | Global Strategy & Sustainability

Ayshan leads LocaRise's international strategy and the development of sustainability, business advisory and AI-integrated communication services. Her work combines environmental science, geographic analysis, corporate development and applied policy research.

PHD IN PUBLIC POLICY | CARLETON UNIVERSITY, CANADA

IN PROGRESS

Research focus: sustainable energy policy; industrial decarbonization; energy-transition governance; policy implementation and intermediaries.

DBA IN MANAGEMENT | UNIVERSITY OF EXETER, UK

ENVIRONMENTAL SUSTAINABILITY STREAM • IN PROGRESS

Research focus: organizational sustainability, AI-enabled business strategy, sustainability governance, responsible innovation and corporate transformation.

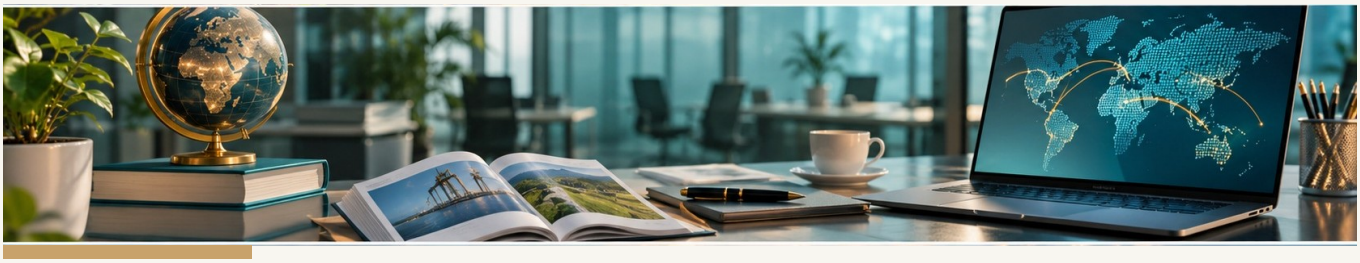

COMPLETED EDUCATION & PROFESSIONAL DESIGNATIONS

MSc Geography — Anthropocene Studies, University of Ottawa • **MSc** Geographical Ecology, Baku State University • **BSc** Environmental Science, Baku State University • **Project Management Professional (PMP)**

PEOPLE & EXPERTISE

The LocaRise team

Clear responsibilities, direct points of contact and coordinated support across the two companies and their specialist advisory brand.

Mehriban Aliyeva

Lead Project Manager — Translation & Localization

Multilingual project management, client coordination, specialized document delivery and quality control.

mehriban@locarise.az
+994 55 578 23 79

Sevinj Isgandarova

Business Development & Client Relations Manager — Enterprise Solutions

Corporate client relationships, commercial coordination, opportunity qualification and cross-border engagement.

sevinj@locarise.ca
